PRESENTING HISTORY

Patient Mr. Rajesh Kumar Sharma, a 42-year-old male, presented to the Emergency Department on 12-March-2024 following a road traffic accident (RTA). Patient was a pillion rider on a two-wheeler that collided with a truck at approximately 60 km/h. Patient was brought by ambulance with complaints of severe pain in the right thigh, inability to bear weight, and brief loss of consciousness (~2 min). On arrival: GCS 14/15, BP 148/92 mmHg, Pulse 102/min, SpO2 98% on room air. X-Ray right femur confirmed displaced mid-shaft fracture. CT Head showed no intracranial haemorrhage. Referred to Orthopaedic Surgery for definitive management. MLC (Medico-Legal Case) registered: MLC/2024/0843.

SURGICAL PROCEDURE

Procedure:	Open Reduction and Internal Fixation (ORIF) · Right Femur
